Summary

Computer Science and Engineering student building practical experience across full-stack web development, collaborative applications, AI-enabled platforms, embedded systems, and hackathon projects. Interested in software engineering and full-stack development, with hands-on experience in React, Node.js, Express.js, JavaScript, databases, Git, and Arduino-based systems.

Keywords

Full-Stack Development Web Development Real-Time Applications AI Platforms Embedded Systems

Professional experience

Engineering Intern

August 2026 - Present

Axlero Solutions

Prepared project presentation scripts and authored mid-month review documentation. Coordinated and scheduled final project review milestones and generated internal corporate notices.

Education and training

B.Tech in Computer Science and Engineering

10 Sep 26 - Present

JIS College of Engineering | Kolkata | <https://www.jiscollege.ac.in/>

Currently pursuing a B.Tech in Computer Science and Engineering.

Personal skills

Communication skills

Recognize the importance of accuracyProject self-confidence, authority and enthusiasm

Job-related skills

React, Node.js, Express.js, HTML, CSS, JavaScript, Vite, MongoDB, MySQL, Socket.io, Yjs, REST APIs

Digital skills

Git, GitHub, Visual Studio Code, MongoDB Compass, MySQL Workbench

Other skills

Arduino UNO, Microcontrollers, L293D Motor Driver, Bluetooth Modules, Sensors, Servo Motors, VHDL

Hobbies

Programming

Gaming

Web Development

Technology

Further information

Projects

- **SyncSpace**
 - Developed a real-time collaborative code editor and whiteboard workspace using Socket.io and Yjs for state synchronization, with admin handoff logic and custom room approval interfaces.
- **Matrixon**
 - Built a web-based learning application featuring an interactive terminal interface and custom CSS themes; integrated local WebGPU model execution and ping status utilities.
- **VayuSetu**
 - Engineered an AI-powered satellite-based air quality intelligence platform for the Bharatiya Antariksh Hackathon 2026.
- **Rampage United**
 - Designed a multiplayer typing-speed fighting game featuring dynamic combat mechanics, weapon stores, and complex character animation systems.
- **Forma AI**
 - Configured a full-stack internship project within a modular codebase, managing repository settings and client-side package dependencies.
- **Shape-Shifting Smart Car Prototype**
 - Constructed a Bluetooth-controlled robotic vehicle , including hardware manifests, wiring blueprints, and Arduino control code .

Certifications

- **NPTEL Certification in Programming in Java**
 - April 2026.

Memberships

- **Bharatiya Antariksh Hackathon**
 - Participant, July 2026.
- **Quantumard National Hackathon**
 - Team Lead (PENTABOTs), **AIR Rank 38** Phase 2 Build Round, March 2026.
